Work Experience

Horizon Broadband Private Limited

Software Engineer (SDE) – Node.js, MongoDB, Redis, Serverless, Microservices, AWS

July 2023 - Present
Bangalore, India

- Developed and implemented **SDK** for seamless integration with applications and platforms, enhancing functionality and improving developer experience.
- Developed scalable **Restful CRUD APIs**, improving data management efficiency and reducing error rates by **15%**.
- Reduced **codebase size** by **85%** through refactoring, enhancing maintainability, and cutting system resource usage.
- Implemented **JWT-based** secure authentication, safeguarding user data and achieving a **20%** increase in security compliance.
- Optimized **data retrieval** by integrating Redis caching, cutting API latency by **20%** and boosting system responsiveness.
- Worked on **5 Projects** to streamline database operations, collaborating with cross-functional teams and achieving **10%** reduction in query processing time.
- Provided **prompt and sustainable** solutions for bugs and issues encountered in the Production Environment, ensuring smooth operation of the system.

Faclon Labs

Frontend Intern – Angular 2, Node.js and Firebase

Dec 2022 - Mar 2023
Mumbai, India

- Spearheaded the development of a Recipe Book application using **Angular 2** for the frontend, Node.js for the backend, and Firebase for real-time data synchronization.
- Improved user experience by **25%** through seamless real-time updates.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, SQL

Back-End Tech: Node.js, Express.js, Serverless

Databases: MySQL, NoSQL

Version Control: Git, GitHub, GitLab

Cloud: Amazon Web Services (AWS), Docker

Core Subjects: Data Structures and Algorithms, Operating Systems, Networking

Miscellaneous: Multithreading, Design Patterns, Low-Level Design, High-Level Design, Agile

Personal Projects

Recipe Book | Angular 2, Node.js, Firebase

Dec 2022 - Mar 2023

- Developed a feature-rich web application enabling users to **create, update, and manage recipes**, boosting engagement.
- Implemented secure **user authentication** using Firebase, increasing user trust and retention.

LifeCare Portal | React, Java, Spring Boot, Spring Security, Hibernate, MySQL

Aug 2022 - Sep 2022

- Designed a hospital management platform, streamlining **real-time monitoring** of oxygen and bed availability.
- Reduced **response time** during emergencies by **30%**, enhancing critical healthcare access during the COVID-19 pandemic.

Education

- Centre for Development of Advanced Computing (C-DAC)

PG Diploma in Advanced Computing (PG-DAC)

Percentage : 70%

- K.J. Institute of Engineering and Technology

B.E : Computer Engineering

CGPA : 7.61

Certifications

- Blockchain Basics**
- Getting Started with Docker**
- Getting Started with DevOps**
