Work Experience

Horizon Broadband Private Limited

Software Engineer (SDE) – Node.js, MongoDB, Redis, Serverless, Microservices, AWS

July 2023 - Present
Bangalore, India

- Developed **SDK** for seamless app integration, optimizing workflows and software interoperability.
- Built scalable **RESTful APIs**, reducing error rates by **15%** and streamlining data management.
- Refactored legacy code, reducing size by **85%**, improving maintainability, and cutting resource consumption.
- Implemented **JWT-based authentication**, enhancing security compliance by **20%**.
- Optimized data retrieval with **Redis**, reducing API latency by **20%**.
- Resolved production issues promptly, ensuring seamless system performance.

Faclon Labs

Frontend Intern – Angular 2, Node.js, Firebase

Dec 2022 - Mar 2023
Mumbai, India

- Led development of **Recipe Book** app with **Angular 2**, **Node.js**, and **Firebase**.
- Improved user engagement by **25%** through real-time updates and UI enhancements.

Projects

HZ-CMS | SDK, API Development, CMS Integration

Nov 2024 - Present

- Developed a **dynamic SDK** for client application integration, reducing CMS modification efforts.
- Integrated **60+ APIs** for flexible CMS interactions across client applications.
- Designed modular functions to optimize CMS data access and developer efficiency.

VIVRE | Serverless, Node.js, RESTful APIs, Redis, System Optimization

Aug 2023 - Present

- Refactored codebase, reducing size by **85%** for better maintainability and resource efficiency.
- Built **scalable RESTful APIs**, cutting **error rates by 15%** and improving data management.
- Optimized data retrieval with **Redis**, reducing API latency by **85%**.
- Used **serverless architecture**, enhancing scalability and cost-efficiency.
- Resolved **production issues** quickly to ensure system reliability.

SIA | Project Management, System Integration

July 2024 - Sept 2024

- Managed system integrations, ensuring smooth transitions and reliable performance.
- Oversaw project lifecycles, ensuring proactive system performance management.

SARA | RESTful APIs, Scalability, System Architecture

Apr 2024 - May 2024

- Developed **scalable RESTful APIs** to improve data management and system performance.

VIU Microservices | Node.js, System Optimization

Feb 2024 - Mar 2024

- Refactored legacy code, reducing size by **85%** for better maintainability.
- Resolved **production issues** efficiently to ensure system stability.

DHS | Node.js, Express.js, RESTful APIs, JWT, Security, Data Management

July 2023 - Oct 2023

- Developed **scalable RESTful APIs** for optimized backend performance and data throughput.
- Improved system reliability, reducing **error rates by 15%**.
- Implemented **JWT-based authentication**, boosting security compliance by **20%**.
- Built the system with **Node.js** and **Express.js** for robust backend solutions.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java
Back-End Technology: Node.js, Express.js, Serverless
Front-End Technology: React.js, Next.js, Angular 2
Databases: MySQL, NoSQL
Version Control: Git, GitHub, GitLab
Cloud Technology: Amazon Web Services (AWS), Docker
Core Subjects: Data Structures and Algorithms, Operating Systems, Networking

Certifications

- Blockchain Basics
- Getting Started with Docker
- Getting Started with DevOps
