

# Aniruddh Patil

Software Engineer (Backend)

aniruddh1995@yahoo.com — 15aniruddh — Portfolio

Bengaluru, India — +91-9423063703

## Work Experience

---

### Backend Engineer

Jun 2023 - Present

Horizon Broadband Private Limited — Bengaluru

- Backend Developer with 2.10+ years of experience building and optimizing scalable, high-availability systems.
- Skilled in Node.js, Express, MongoDB and Redis with expertise in microservices, serverless architectures and AWS services to deliver secure, cost-efficient solutions.

### Frontend Intern

Dec 2022 - Dec 2023

Faclon Labs — Mumbai

- Completed a 3-month internship in frontend development, gaining hands-on experience with Angular 2 and worked on UI bug fixes and layout refinements.

## Projects

---

### Vivre (SaaS Platform)

Aug 2023 - Present

- Designed and developed serverless CRUD APIs using Node.js, AWS Lambda, and API Gateway.
- Implemented JWT-based authentication and role-based authorization (RBAC) for secure access control.
- Integrated Redis caching to optimize API latency, reducing response times from 2–4 seconds to ~150ms.
- Implemented image optimization pipeline, converting images to WebP format to improve platform performance and bandwidth efficiency.
- Focused on high availability, scalability, and cost optimization using serverless architecture.

### HZ-CMS (Software Development Kit)

Nov 2024 - Present

- Architected an adapter layer to onboard multiple content partners into a unified system.
- Ensured a single source of truth by normalizing and standardizing partner responses.
- Maintained consistent API response contracts, eliminating platform-level changes for new integrations.
- Improved system extensibility and reduced integration effort for downstream consumers.

### Hospitality (Hotel Management System)

Jul 2023 - Aug 2023

- Developed backend services for a hotel room ordering system enabling in-room service requests.
- Built APIs to dynamically fetch available hotel services and items per property.
- Focused on scalable API design to support multiple hotels and rooms.
- Ensured reliable data handling and optimized API responses for real-time user interactions.

### Sara Dashboard (AI Recommendation)

Apr 2023 - May 2023

- Developed CRUD APIs to power analytical dashboards for platform metrics and insights.
- Implemented MongoDB aggregation pipelines to efficiently generate graphs and reports.
- Optimized database queries for performance and reduced load on large datasets.
- Enabled data-driven visualization by structuring backend APIs for frontend analytics consumption.

## Core Skills

---

JavaScript, TypeScript, Node.js, Express.js, Python, SQL, NoSQL, MySQL, PostgreSQL, DynamoDB, React.js, S3, ECS, CloudFormation, CloudFront (CDN), AWS Glue, Athena, Docker, RESTful API, Serverless, Microservices, CI/CD, AWS CloudWatch, ELK (Elasticsearch), Git, GitHub, GitLab, Bitbucket, Shell Script, Prompt Engineering, AI & Generative AI (ChatGPT, Claude, Cursor)
