

Aniruddh Patil

Software Engineer · Serverless · AWS · Node.js · Microservices

aniruddh1995@yahoo.com | github.com/15aniruddh | [Portfolio](#) | Bengaluru, India | +91-94230 63703

Summary

Software Engineer with **3 years** of hands-on experience building serverless APIs, microservices and cloud-native systems on AWS. Delivered measurable performance wins — including a **10× reduction in API latency** using Redis caching. Adept at designing secure, cost-efficient, highly available architectures using Node.js, JavaScript, MongoDB, DynamoDB, and AWS stack. Comfortable owning end-to-end delivery from system design to production deployment.

Work Experience

Software Engineer · Bengaluru

Jun 2023 – Present

Horizon Broadband Pvt. Ltd.

- Designed, built, and maintained production serverless APIs for the **Vivre SaaS platform** using **Node.js, AWS Lambda and API Gateway** — supporting real end-users with high availability and low operational overhead.
- Slashed API response times from **2–4 seconds to ~150ms** by integrating **Redis** caching, delivering a 10× latency improvement and reducing unnecessary compute invocations.
- Implemented **JWT-based authentication** and role-based access control (**RBAC**) ensuring secure, fine-grained access for different user roles across the platform.
- Built an **image optimization pipeline** (PNG/JPG → WebP conversion) that improved page load performance and reduced CDN bandwidth costs platform-wide.
- Architected **HZ-CMS**, an adapter-layer SDK that onboards multiple content partners into a single unified API — standardizing response contracts and eliminating per-partner platform changes for downstream consumers.
- Contributed to infrastructure setup using **AWS CloudFormation, ECS, S3, CloudFront, CloudWatch** and **AWS Glue/Athena** for data processing and observability.

Frontend Intern · Mumbai

Dec 2022 – Mar 2023

Faclon Labs

- Developed and refined UI components using **Angular 2**, resolving bugs and improving layout consistency across production dashboards used by operations teams.

Projects

Vivre · Node.js, Lambda, API Gateway, Redis, JWT, WebP

Aug 2023 – Present

- Full ownership of backend: serverless CRUD APIs, auth, caching layer, and media pipeline for a live multi-tenant SaaS product.

HZ-CMS · Node.js, Adapter Pattern, REST

Nov 2024 – Present

- SDK that normalizes heterogeneous partner responses into a single contract — improving extensibility and cutting new-partner integration time significantly.

Hospitality · Node.js, REST APIs, MongoDB

Jul 2023 – Aug 2023

- Backend APIs for real-time in-room service ordering with dynamic menu fetching across multiple hotel properties.

Sara Dashboard · Node.js, MongoDB Aggregation

Apr 2023 – May 2023

- Aggregation-pipeline-driven APIs powering analytical dashboards with graphs and reports for business intelligence.

Technical Skills

Languages	JavaScript, TypeScript, Python, SQL
Backend	Node.js, Express.js, REST APIs, Serverless Architecture, Microservices
Databases	MongoDB, PostgreSQL, MySQL, DynamoDB, Redis, NoSQL, SQL
AWS	Lambda, API Gateway, S3, ECS, CloudFormation, CloudFront, CloudWatch, Glue, Athena
DevOps & Tools	Docker, CI/CD, Git, GitHub, GitLab, Bitbucket, Shell Script, ELK (Elasticsearch)
Frontend	React.js, Angular 2
AI & Other	Prompt Engineering, Generative AI (ChatGPT, Claude, Cursor)
